The following significant accounting policies have been adopted by the Company and its subsidiaries in the preparation of these consolidated financial statements.

The accounting policies that have been adopted by the Company and its subsidiaries in the preparation of these consolidated financial statements are consistent with those adopted in the preparation of the latest annual consolidated financial statements.

FORM B 09a-DN/HN

インノト人の川

These notes form an integral part of and should be read in conjunction with the financial statements

#### Associates (ii)

Associates are those entities in which the Company has significant influence, but not control, over the financial and operating policies. Associates are accounted for using the equity method. They are initially recognised at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated interim financial statements include the Company's share of the profit or loss of the associates, after adjustments to align the accounting policies with those of the Company, from the date that significant influence commences until the date that significant influence ceases. The carrying amount of investments in associates is also adjusted for the alterations in the Company's proportionate interest in the associates arising from changes in the associates' equity that have not been included in the income statement (such as revaluation of fixed assets, or foreign exchange translation differences, etc.).

When the Company's share of losses exceeds its interest in an associate, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Company has an obligation or has made payments on behalf of the associate.

#### Transactions eliminated on consolidation (iii)

Intra-group transactions, balances and any unrealised income and expenses arising from intragroup transactions, are eliminated in preparing the consolidated interim financial statements. Unrealised gains and losses arising from transactions with associates are eliminated against the investment to the extent of the Company's interest in the associates.

#### Business combination (iv)

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that presently are exercisable are taken into account.

#### Foreign currency transactions (b)

Transactions in currencies other than VND during the period have been translated into VND at rates approximating actual rates of exchange ruling at the transaction dates.

Monetary assets and liabilities denominated in currencies other than VND are translated into VND at the account transfer buying rates and account transfer selling rates, respectively, at the end of the accounting period quoted by the commercial bank where the Company or its subsidiaries most frequently conduct transactions.

All foreign exchange differences are recorded in the consolidated statement of income.

FORM B 09a-DN/HN

11. 1 H

These notes form an integral part of and should be read in conjunction with the financial statements

#### (c) Cash and cash equivalents

Cash comprises cash balances and call deposits. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

#### (d) Investments

#### (i) Held-to-maturity investments

Held-to-maturity investments are those that the Company's or its subsidiaries' Board of General Directors has the intention and ability to hold until maturity. Held-to-maturity investments include term deposits at bank and long-term bonds. These investments are stated at costs less allowance for doubtful debts.

#### (ii) Equity investments in other entities

Equity investments in other entities are initially recognised at cost which include purchase price plus any directly attributable transaction costs. Subsequent to initial recognition, these investments are stated at cost less allowance for diminution in value.

Allowance is made for diminution in investment values if the investee has suffered a loss which may cause the Company or its subsidiaries to lose their invested capital, unless there is evidence that the value of the investment has not been diminished. The allowance is reversed if the investee subsequently made a profit that offsets the previous loss for which the allowance had been made. An allowance is reversed only to the extent that the investment's carrying amount does not exceed the carrying amount that would have been determined if no allowance had been recognised.
